

EDUCATION

University of Western Ontario

BSc. Computer Science & Ivey Honours Business Administration, Western Scholarship of Distinction

- Relevant Coursework:** Data Structures and Algorithms, Linear Algebra, Software Engineering

Sep. 2023 – May 2028

London, ON

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, SQL, HTML, CSS
Technologies: React, PostgreSQL, Docker, Git, TailwindCSS, Unix

EXPERIENCE

PointClickCare

Software Engineering Intern | Product Team

May 2026 – Aug. 2026

Toronto, ON

PointClickCare

Software Engineering Intern | TypeScript, React, Backstage, Windmill, Azure, Jenkins

May 2025 – Aug. 2025

Toronto, ON

- Accelerated developer velocity by engineering automated onboarding workflows in Backstage, reducing manual setup
- Developed custom React/TypeScript plugins for internal developer portals, simplifying access to CI/CD status
- Secured LLM agent workflows via IAM integration, ensuring robust access control for all production deployments
- Automated Azure AI key provisioning and audit logging, cutting latency from ~24h (SRE tickets) to less than 10s

Plan International

Software Engineer | SQL Server, TypeScript, React, Python, Azure

Sep. 2025 – Apr. 2026

London, ON

- Led the migration of an outdated legacy financial tool to a modern stack, eliminating technical debt and manual overhead
- Engineered dynamic SQL config for realtime updates, eliminating redeployments and cutting latency from hours to seconds
- Automated revenue aggregation across two global offices, implementing support for 8 currencies and 340+ unique grants
- Implemented and integrated security protocols including encryption at rest and RBAC with existing identity management

Tenacity Labs

Software Engineer | Python, Django, PostgreSQL, React, TypeScript | Repository: [TenacityLabs](#)

Apr. 2024 – May 2025

Remote

- Built an unintrusive extension for Instagram analytics, implementing custom data extraction logic to track follower churn
- Scaled to 3,000+ weekly active users and 10,000+ downloads across 100+ countries through purely organic growth
- Developed across a full-stack architecture using Postgres for relational data and Next.js for a high-performance dashboard
- Partnered with designers & engineers to iterate on features using user feedback, improving global engagement & retention

PROJECTS

Valorant ML Match Predictor | Python, Beautiful Soup 4, Pandas, Scikit-learn

[GitHub](#)

- Collected, cleaned, and processed 36,000+ matches with Beautiful Soup and Pandas to enable efficient data analysis.
- Built a Gradient Boosting Classifier with SkLearn to predict match outcomes, leveraging advanced ML techniques
- Optimized model with hyperparameter tuning and an Elo rating system, achieving a prediction accuracy of 70%

Sunflower Capital Landing Page | Next.js, HTML, CSS, TailwindCSS, TypeScript

[GitHub](#)

- Built a responsive and visually engaging landing page leveraging modern frontend frameworks and technologies
- Integrated custom animations with Glide.js and full-page scroll effects while prioritizing sub-second load times
- Worked closely with designers to ensure consistency with brand identity, aesthetics, and user-centered design

Retrospect Mobile App | Swift, SwiftUI, UIKit, Core Data, Firebase

[GitHub](#)

- Developed a mobile app in Swift, emphasizing an intuitive user experience with smooth navigation and a clean design
- Integrated Core Data for efficient local data storage and Firebase for real-time data sync, user auth, and analytics
- Built a responsive and engaging interface using SwiftUI and UIKit, ensuring a seamless experience across all devices

PERSONAL INTERESTS & HOBBIES

- Downhill Skiing & Swimming (Provincial), Basketball, Crosswords, Ultimate Frisbee, Minesweeper, Sailing, Zetamac
