

---

EDUCATION

---

**University of Western Ontario***BSc. Computer Science & Ivey Honours Business Administration, Western Scholarship of Distinction*

Sep. 2023 – Present

London, ON

- **Relevant Coursework:** Data Structures & Algorithms, Linear Algebra, Software Engineering

---

TECHNICAL SKILLS

---

**Languages:** JavaScript, TypeScript, Python, SQL, HTML, CSS**Technologies:** React, PostgreSQL, Docker, Git, Tailwind, Unix

---

EXPERIENCE

---

**PointClickCare**

May 2026 – Present

*Software Engineering Intern | React, TypeScript, Java, Spring Boot*

Toronto, ON

- Developed features across the stack for a senior living platform branching off a legacy app used by **27,000+** care providers
- Built billing workflows, decoupling logic from a monolith to a modular service used by **350+** facilities across **100+** orgs
- Wrote unit, component, and end-to-end tests (Cypress, Selenium), improving reliability across billing & clinical workflows
- Collaborated with product and UX to scope, build, and ship features spanning three services from design through delivery

**PointClickCare**

May 2025 – Aug. 2025

*Software Engineering Intern | TypeScript, React*

Toronto, ON

- Engineered a Backstage scaffolder action for AI API key provisioning & auditing, cutting retrieval time from **24h to <10s**
- Built a custom Backstage catalog page with tier-based filtering spanning **400+** components & **500+** applications
- Enforced PHI access controls in Windmill via a request-expiry job and DB-role deny test, supporting HIPAA compliance
- Implemented OAuth2 SSO on an internal AI platform, propagating session identity & RBAC across a 5-agent system

**Plan International**

Sep. 2025 – Apr. 2026

*Software Engineer (Pro Bono) | React, TypeScript, FastAPI, SQL*

London, ON

- Led the migration of an outdated legacy financial tool to a modern stack, eliminating technical debt and manual overhead
- Engineered dynamic SQL config for real-time updates, eliminating redeployments & cutting latency from hours to seconds
- Automated revenue aggregation across two global offices, implementing support for 8 currencies and **340+** unique grants
- Implemented encryption at rest and RBAC, integrating both with the organization's existing identity management system

**Tenacity Labs**

Apr. 2024 – May 2025

*Software Engineer | React, TypeScript, Python, PostgreSQL*[GitHub](#)

- Developed products through a student-led organization, collaborating with designers and engineers to ship features
- Built an unintrusive extension for Instagram analytics, implementing custom data extraction logic to track follower churn
- Scaled to **3,000+** WAU and **10,000+** downloads across over 100 countries through purely organic product growth
- Owned features across a full-stack architecture using PostgreSQL and Next.js for a high-performance dashboard

---

PROJECTS

---

**Spotify Analytics Dashboard | React, TypeScript, FastAPI, PostgreSQL**[spotify.andrewdurnford.com](https://spotify.andrewdurnford.com)

- Built a full-stack analytics dashboard to visualize over **228,000 plays** across 6 years of Spotify listening history
- Engineered an import pipeline with skip filtering and duplicate detection to ensure accurate Spotify analytics
- Implemented completion-aware Spotify playback tracking to persist finished songs while excluding incomplete listens

**Valorant ML Match Predictor | Python, SQLite**[GitHub](#)

- Built an end-to-end Python pipeline, scraping & normalizing **10,700+** match records into a SQLite database
- Achieved **64% accuracy** on unseen 2026 matches by training a gradient-boosting model with 15 performance features
- Constructed a betting simulator incorporating map selections, achieving **8.6%** simulated EV on available betting odds

**Sunflower Capital Landing Page | React, TypeScript**[GitHub](#)

- Built a responsive and visually engaging landing page leveraging modern frontend frameworks and technologies
- Integrated custom animations with Glide.js and full-page scroll effects while prioritizing sub-second load times

---

PERSONAL INTERESTS & HOBBIES

---

- Downhill Skiing & Swimming (Provincial), Music, Basketball, Crosswords, Frisbee, Minesweeper, Sailing, Zetamac, Golf
